### WooCommerce Backend - Order Updated - Following Notifications from ML ePay

The screenshot displays the WooCommerce Backend interface for Order #X-10. The top navigation bar shows the site name 'Demo: ML ePAY for WooCommerce by SiteShop.ph' and the user 'M Lhuillier'. The left sidebar contains the 'WooCommerce' menu with sub-items: Orders (2), Coupons, Custom Order Numbers, Reports, Settings, System Status, Add-ons, Products, Appearance, Plugins (1), and Users.

The main content area shows the order details for Order #X-10, dated 2015-05-25. The order status is 'Processing'. The customer is 'demo demo (#3 - test@example.com)'. The billing and shipping details are identical: Address: demo demo, Ayala Avenue corner Makati Avenue, Makati City, NCR 1200, Email: test@example.com, Phone: 8135499.

The 'Order Items' table shows one item: 'Premium Quality' with a cost of P20.00, quantity of 1, and total of P20.00.

The 'Order Notes' section on the right contains three notifications:
 

- 'Order item stock reduced successfully.' added on May 25, 2015 at 5:25 pm.
- 'ML ePay Payment SUCCESSFUL' added on May 25, 2015 at 5:25 pm.
- 'Order status changed from On Hold to Processing.' added on May 25, 2015 at 5:25 pm.

## WooCommerce Backend - ML ePay - Debug Log:

The screenshot shows the WooCommerce admin interface with the 'WooCommerce' menu highlighted. The 'Log file: mlepay-4552b5647bd6a52d209e60523936d28d.log (May 25, 2015 5:32 pm)' is open, displaying a list of transaction events. The log includes timestamps, notification types (e.g., 'Notification Received', 'Transaction Code CREATED'), transaction details (e.g., 'Transaction EPAY-TEST-YTZCBDBG3MDE'), and order references (e.g., 'For order #X-3').

## Plugin Features:

### On The Fly Order Status Update

With this plugin, you have an ML ePay Notification Parser, meaning when M Lhuillier - ML ePay Gateway receive a payment, it's automatically send an back-end server-to-server communication to your ML ePay - WooCommerce Webhook URL and this plugin automatically update orders status on the fly within WooCommerce.

### Debug Log Mode

Option to use the plugin in debug mode for Log ML ePay events, such as Transaction Code Created and Notification.

Compatibility with Plugin: Custom / Sequential Order Numbers for WooCommerce (<http://gremlin.io/shop/woocommerce-plugins/custom-sequential-order-numbers-woocommerce>)

- Set your own custom prefix for your orders – make your order numbers friendlier and unique to your store
- Set the length of your order numbers
- Set an increment value, so nobody can guess your real sales volume

- With the increment value, your order numbers will be sequentially increased
- Super easy installation and configuration
- Note: This plugin does not change any existing order numbers.

### Prerequisites to use the plugin:

- MLepay.com merchant account, it's Free to join: <https://www.mlepay.com/business> (<https://www.mlepay.com/business>)
- Your own WordPress & WooCommerce installation
